
(a)
Log-evidence increase
EM iteration
$\sigma_0^2 = 0.12,\ \tau_0^2 = 0.15$
$\sigma_0^2 = 0.6,\ \tau_0^2 = 0.7$
$\sigma_0^2 = 1.2,\ \tau_0^2 = 0.25$
$\sigma_0^2 = 0.6,\ \tau_0^2 = 0$
(b)
Variance estimate / true variance
Initialization
$\widehat{\sigma}^2/\sigma^2$
$\widehat{\tau}^2/\tau^2$
